

Future talent programme

At Novartis, we have a history of firsts, and there's more to come.

We have made huge leaps in science – working on innovations that only a few years ago were the stuff of science fiction. We know that in order to continue to push the possibilities of science, we need people who are smart thinkers, willing to be curious and make brave decisions.

Our next generation of talent will shape the future of science and healthcare. We believe that developing our country's future talent is crucial to the work we do. We offer numerous opportunities for bright, versatile people at different stages of their education, with bespoke learning experiences available.

If you're passionate about driving breakthrough innovation, cutting-edge data and digital science, and delivering real results for patients – read about our graduate internships below.
