

Mission

At Novartis, our mission is to discover new ways to improve and extend people's lives.

Discovering new treatments requires imagination and visionary thinking combined with determination and rigour. This happens every day at Novartis.

We are proud of our contribution to medical progress, but there's still a long way to go. Through the discovery, research and development of innovative treatments and technologies, we aim to tackle devastating diseases and help people in the UK and around the world live longer, better lives.
